Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Specification

1. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-3 are rejected under 35 U.S.C. 102(e) as being anticipated by Nogawa et al. (6726497).

Nogawa (Figures 1-5) shows an electrical connector for a flat flexible cable having a first contact beam 42 in contact with one surface of the cable, a second contact beam 51 in contact with a second surface of the cable, a base beam wherein the ends of the first and second beams are free ends in mutual opposition on one side and the other side are attached together. The rear end portion of the first beam is free end. The second beam is connected to the base beam which comprises a structure affixed to a body which comprises an actuator 30, which engages the rear end portion to actuate the first and second beams. The actuator is capable of deforming the first

contact beam, can move the rear end portion upward relative to the base beam, can deform the second beam and cause the free ends of the two beams to come closer.

The actuator can also deform the second contact beam downward.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Soes (5240430), Saito et al. (6884108), Kunishi et al. (6837740), Kunishi (6206723).
